

I fully support the democratic premise that the radio waves are free. Free speech in this country is being censored by "control" of our free speech radio. Support free speech in America through free public and satellite radio. This is our only way to communicate with each other, with the exception of the Internet, in the new mode of operation in the formerly democratic United States of America.

With the looming industrial complex and imperialism straining our value systems and our pocketbooks, the only way for differing opinions to be heard and for people who are Americans who do not believe in the New World Order laid down by Wolfowitz, Ashcroft, Cheney, Rumsfeld, Rice and puppet Bush, we must have our radios.

People are uniting through information in the secrecy that exists in this illegal administration.

The war is being fought in America right now. I, a believer in truth and democratic systems that our great constitution has upheld for so long, request a very serious ear on this matter of weather reporting. It may seem insignificant, but it is a worm way into other programming. Be strong FCC and protect this fragile freedom of press and radio and speech.
